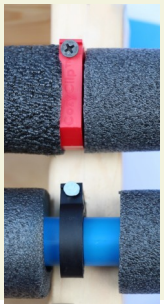
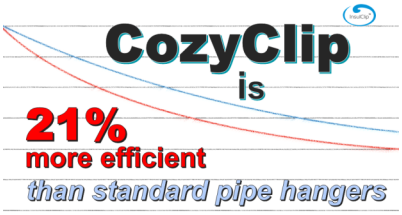
Seal in Efficiency. Stop Energy Loss with CozyClip™



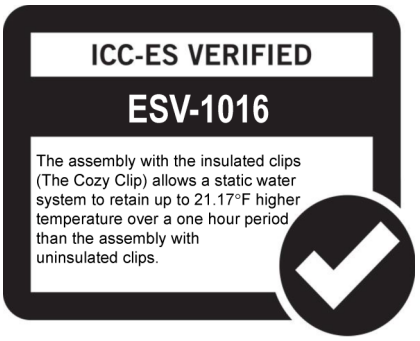
Maximize Energy Efficiency with CozyClip™

As energy codes evolve, continuous insulation on domestic water lines is now essential. CozyClip™ is a patented, ICC-ES verified insulated pipe support that eliminates thermal bridging at pipe hangers—one of the most overlooked sources of energy loss. By maintaining insulation continuity, CozyClip™ improves system performance, reduces heat loss, and helps energy programs achieve measurable savings across residential and commercial projects.



- **Up to 21% greater thermal efficiency** vs. uninsulated supports
- **Reduces heat loss at critical system gaps** (pipe hangers & supports)
- **Simple installation improves performance** & reduces heater runtime
- **Proper insulation raises delivered water temperature by 2°F–4°F**, allowing lower heater settings (see DOE website)
  source: www.energy.gov/energysaver/do-it yourself-savings project-insulate hot-water-pipes

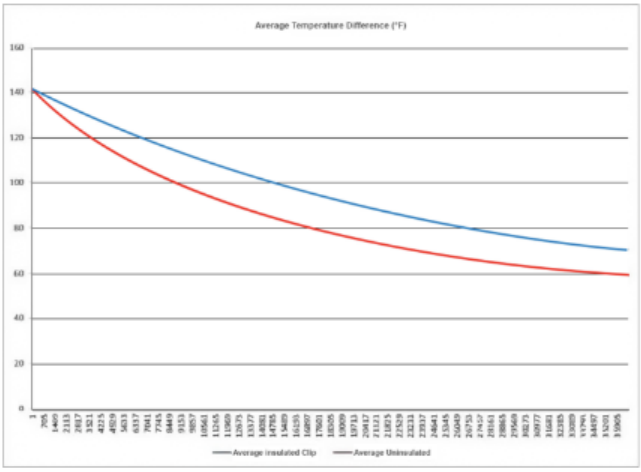
- **Faster hot water delivery** → saves both **energy & water**
- **ICC-ES Verified (ESV-1016)** – fully compliant with energy & building codes
- **Ready for latest energy code requirements** & future compliance standards
- **Low-cost, high-impact solution ideal for rebate** & **efficiency programs**
- **Scalable solution for utility rebate & incentive programs** across multiple sectors
- **Reduces annual hot water energy costs → significant energy & water savings**



The CozyClip™: Energy Savings

INTERNATIONAL CODE COUNCIL
Testing Procedure

- **ICC-ES independent lab test results showing up to 21.17°F higher temperature with CozyClip™.**
- **ICC test procedure used 140° hot water circulating in a 40° test chamber, creating a 100° temperature difference.**
- **21.17° is 21% of the 100° difference.**
- **ICC Evaluation Service certified to meet IECC C404.4, R403.3 (IRC N1103.4), R403.5.2, & IPC 607.5**



Maximum Temperature Difference: 21.17
